

Fast Facts: Advanced Utilities

Everyone *talks* about compliance, but SpoolFlex delivers it, advancing iSeries report distribution to light speed. SpoolFlex Advanced Utilities automate forms and report distribution automatically converting to electronic formats, emailing them directly from your iSeries to the people who need them. Automated electronic filing places copies in your IFS or network server, to burn to CD. Intelligently sort, split, and combine reports based on variable data on the spooled page, dynamically naming and routing to multiple users. 100% native RPG software solution,

Advanced Utilities work with both SpoolFlex and FormFlex to automate your form and document distribution, significantly reducing postage and paper use, and improving your bottom line.

SpoolFlex automated form and report distribution gets business-critical data where it's needed in the blink of an eye, without breaking the bank.

What are the Advanced Utilities?

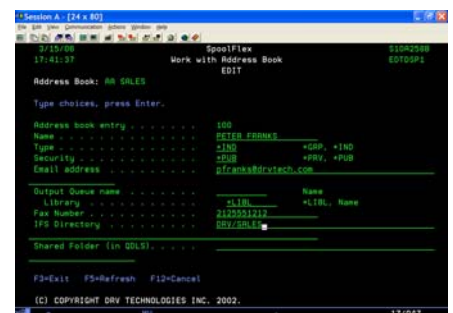

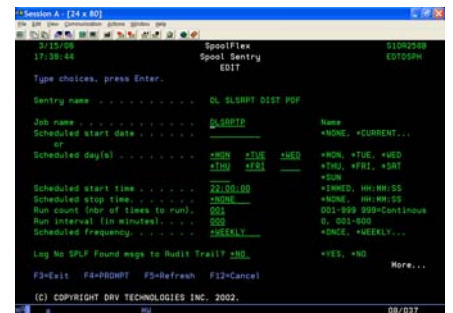

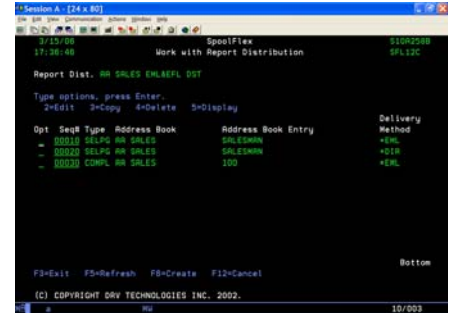

This add-on module automates eDelivery and FormFlex, enabling automated bursting and distribution of forms and reports. The Advanced Utilities provide the Spool Sentry to automate, address books to provide distribution information such as email addresses, and Report Distribution structures to store the conditional rules for all of your report distribution processing.

Fast Facts: Advanced Utilities

The Advanced Utility Module adds advanced automated electronic report delivery to take full advantage of SpoolFlex push technology without user intervention:

- **Report Distribution** - deliver complete reports or specific pages to multiple recipients through email, file transfer, fax and/or print. Set up multiple sequences to automate a process to email a spreadsheet to field operations, place a copy on the server, and email a PDF to the manager. Create report distributions based on rules that will execute day in and day out, and never miss a deadline!
- **Spool Sentry** – Eliminate the need for user intervention with this queue monitor / job scheduler that automates SpoolFlex processing, looking for assigned reports interactively on demand, or unattended batch processing in the middle of the night. Executes any SpoolFlex, IBM or 3rd party API that can be called from a 400 command line – automates complete report processing.
- **Address Book** – Stores report distribution information such as email address, fax number, output queue etc. Tell SpoolFlex to pull the routing information for automated distribution without user intervention.

Additional Features in Advanced Utilities:

- **Sorting** – dynamically combine and sort reports by multiple fields on the spooled file (examples: invoices sorted by customer number for e-filing or by zip code to take advantage of bulk rate postage)
- **Report Splitting** – burst reports based on data in the spooled file with unique naming for electronic filing and easy retrieval. Burst 1,000 page report into 1,000 one-page reports, or vice versa!
- **Zip Files** – compress e-format files using our own zip utility to email and store larger files (compatible with Windows zip programs).
- **Auto Convert** - Specify Output Queues to automatically convert all spooled files to specified e-Format.
- **Extractor** – search through spooled file and extract pages based on data on the spooled page.
- **Move / Delete** - for managing Spooled Files (example: Delete spooled files older than 60 days, Move spooled files with Form Type *STD to OUTQ X)

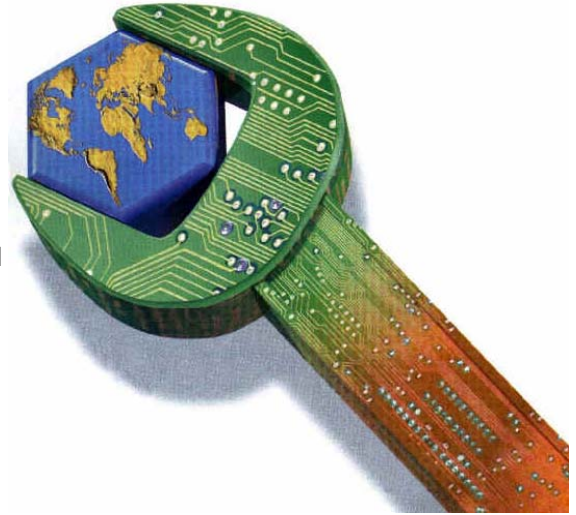

Pricing: The Advanced Utilities module is flat-priced, and is an add-on to e-Delivery. Purchase only the pieces you need for your workflow. Contact a DRV AS400 Report and Distribution Specialist to discuss which modules best fit your needs, and for a pricing proposal for your project.

Fast Facts: Advanced Utilities

Annual Maintenance

- Annual maintenance is calculated at 15% of software list price at time of purchase and is invoiced annually.
- DRV's Early Adoption Program allows customers to lock in their annual maintenance at the original rate, even if the price of the software increases, as long as maintenance is kept active without interruption. Additional software purchases are simply added to the original rate.
- License transfers - New activation codes due to system upgrades that change serial or processor number are provided at no charge to customers with active maintenance.
- Support - Annual maintenance includes unlimited technical support, and free enhancements and updates provided via the web. Updates and support require an active agreement.
- Desktop sharing technology allows DRV support agents to share your screen, making set up and support a snap!
- Documentation is provided in PDF format and online help in the software.

Implementation / Training

- SpoolFlex is easy to set up; most clients implement critical reports during the evaluation phase. DRV provides technical support throughout the free trial to help you determine quickly how the software will work in your environment.
- FormFlex is delivered as a turnkey solution, with form designs provided by DRV. Documents can be edited and changed by end user with iSeries based editor.
- DRV provides live online training sessions with project managers, eliminating overhead associated with travel, and keeps implementation costs low.
- All SpoolFlex and FormFlex modules backed by a **30-day money back guarantee!**

All DRV products integrate easily in to your existing information structure without modifications to your existing applications. DRV offers free webcasts to provide you with solution overviews and case studies showing how other organizations use the software to streamline their document management. For proof of concept, you can download SpoolFlex for a free 15-day, fully supported evaluation on your system.

Whether your business is finance, manufacturing, distribution or even a government agency, SpoolFlex will save you time and money, for a small investment.
