

## What is FormFlex?

**FormFlex** native IBM i, iSeries and AS/400 software lets you replace pre-printed forms and obsolete impact printers with electronic forms and checks that print on standard HP-compatible laser printers using plain cut sheet paper, or output to PDF to automatically email, fax and archive, based on variables and your business rules. No PC hardware or custom programming is required.

- FormFlex:** Create and store electronic forms natively on the IBM i for maximum reliability and security. Merge forms with boxes, lines, logos and barcodes with data and print to inexpensive HP-compatible (PCL5) laser printers. Eliminate storage and inventory of pre-printed forms with electronic documents that can be edited when changes are needed. Print multi-part forms, collate and duplex, even pull from different drawers on the printer. Integrates with any IBM i application spooled files without programming.

ITEM	DESCRIPTION	QUANTITY	UNIT PRICE	AMOUNT
1 ITEM 172204	172204	10000.00	8.0000	80000.00
4001 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4002 DELIVER ON 4/10/07		20000.00	8.0000	160000.00
4003 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4004 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4005 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4006 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4007 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4008 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4009 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
4010 DELIVER ON 4/10/07		10000.00	8.0000	80000.00
TOTAL ORDERING		100000.00		800000.00

## FormFlex Optional Add-On Modules:

- PDFDirect Output:** Why print when you can output forms to PDF for emailing, e-faxing and archiving. PDF's are text searchable and support color images, color boxes and lines. Burst forms based on data in the spooled file for individual delivery by email and archive with unique naming for easy search and retrieval. Automate seamless distributions with built in job scheduling, data queue monitor or add API's to your own programs.
- E2Fax Add-On:** Interface to inexpensive internet fax service to send faxes without hardware or fax lines!
- Audit Trail Add-On Module:** allows you to track and detail when and where reports have been distributed, to whom, by whom, archive location, delivery method and more! It's like having a searchable "Sent" box on your IBM i for FlexTools distribution.
- SecureChex Add-On Module or Stand Alone Solution:** Enhance the security of your check printing process with Secure MICR Laser Check printing, featuring encrypted signature security, password protected access, separate checkbooks, check register, Positive Pay support, and profile level security levels. No additional hardware is required since everything resides securely in the software on the IBM System.

Every organization exchanges documents with their business partners. In addition to the cost savings provided by automated electronic distribution and paperless electronic filing, FormFlex projects the professional image your company deserves. Industry studies conclude that 17% of daily revenue is consumed by the business-critical documents they exchange. Slash those costs with electronic forms distribution and archiving!
