

# FastFacts: eDelivery

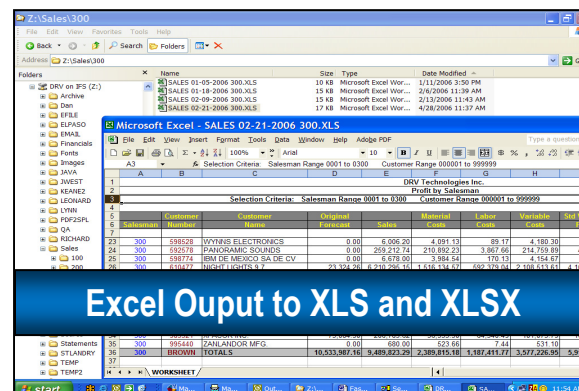

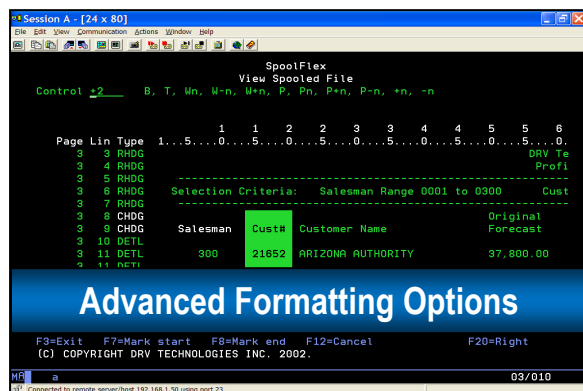

## What is SpoolFlex eDelivery?

**SpoolFlex eDelivery** module is an easy to use software that converts spooled files to a variety of e-formats, including Excel, PDF, Word, HTML, TXT, CSV, and more!

- **Convert to PDF:** Convert reports up to 378 characters wide to PDF without unwanted word wrapping. Generate text-searchable PDF documents that can be opened with the free Adobe Reader® utility. Additional modules allow zip compression, encryption and password protection. SpoolFlex PDFs retain original spooled file attributes without wrapping.

## SpoolFlex Makes IBM i Reports Excel!

- **Convert Spooled Files to Excel:** Convert reports directly to fully formatted Excel spreadsheets (XLS and XLSX), NOT unformatted CSV files. Eliminate manual re-keying and formatting. Exclude headings, correctly format negative numbers, add color highlighting, freeze panes, and zoom. Push spreadsheets out to users using email or archive to Windows environment with dynamic naming and routing based on variable data.
- **Easy to Use Interface:** Convert and email reports interactively using the Manage Spooled File Menu, or call commands from the IBM WRKOUTQ or WRKSPLF menu (requires IBM OS V6.1 or later). Integrate SpoolFlex API's into your CL programs, or add the Advanced Utilities for seamless automated bursting and distribution
- **Email:** Directly from the IBM i, relaying through your existing SMTP settings without the restrictions of SNDDST
